

I have to thank Sri.CA.Rathinagiri Sir (<https://github.com/HMG-Official>) who created a curiosity to me and taught us about how to visualise our imagination/idea in the real life world with the help of technology. Thank u so much sir. You are more than an inspiration to me and also to many persons.

Also I have inspired from Sri.CA.Vigneshwar(Law Sir) sir who is always advanced in many ways.

I dedicate this code to Sri.CA. Narendran sir and Sri.CA.Vigneshvar sir (Inter Sir). It is a big opportunity to me to give something useful from me. 😊😊😊

A special thanks to Gokul (<https://github.com/Gokul712>) and Nandhini for sharing your knowledge in your hustle-fessely time. Of course, there is no thanks and sorry between friends 😊😊😊.

Thanks to Praveen Ji, Hari Vignesh, Gowtham, Ragu, Karvannan, Karthikeyen. Saying Thanks is not enough. Your relationship with me is always unconditional. 😊😊😊
